Wanted to flag this for you. Will let you know Lenny's response. The bold terms are what concern me:

"Collaborative Science & Adaptive Management Program Charter," an agreement for the BO remand and BDCP principles, to be signed by all of them.

The Common Goals

During iterim period, 1) provide adequate protection for listed species and 2) improved operational flexibilty for the Central Valley Project and State Water Project to enhance water supply

Hi Lenny,

The document you sent me is a bit different than the one handed out at DWR yesterday titled "Collaborative Science & Adaptive Management Program Charter". The hard copy one handed out yesterday appears to be an agreement for the BO remand and BDCP principles, to be signed by all of them. Do you know which document is most recent? They look very similar but maybe there are two similar ones for slightly different purposes?

The common Goals in the hard copy document handed out at DWR yesterday state:

"Collaborative Science & Adaptive Management Program Charter"

The Common Goals in the attached document state:

During iterim period, 1) provide adequate protection for listed species adn 2) improved operational flexibiilty for the Central Valley Project and State Water Project to enhance water supply

Attached Untitled Document

Common Goal:

Put a process in place for developing a collaborative adaptive management program for water year 2012/2013. Begin by identifying immediate data needs and developing products we can use to test predictions about the effect of OMR on turbidity, smelt distribution, and salvage under current conditions.

These are pretty different. Are there two very different versions circulating?

Thanks again for sending it to me,  
Erin
